INSTRUCTION SHEET

Read all product instructions and labels before proceeding with installation. For best results from using Enviro Save Metal Treatment Products, these instructions are recommended.

BEFORE ENVIRO SAVE PRODUCT INSTALLATION

1. Document any history of oil analysis, vehicle defects or maintenance actions.
2. All Oil Analysis Samples should come from the old oil just before a change.
3. Oil Change intervals should be consistent before and after the testing period.
4. Never sample the oil with any Enviro Save Pre-Treatment (Diesel Only).
5. Discuss operation of the Vehicle with the Client and/or Employee.
6. Record applicable information on the Vehicle Form VH1

DURING THE TESTING CYCLE or INSTALLATION CYCLE

1. Record any comments from the Operator of the Vehicle or Equipment.
2. Be sure the Vehicle has been operating the same way from pre-testing.
3. On Diesel Equipment – add pre-treatment cleaner before Oil Change – and run 8 hours.
4. On Gas Equipment – there is no need for pre-Treatment.
5. Always change all fluids where Enviro Save Treatments are being added except Power Steering.
6. Add Enviro Save to new fluids and operate the equipment for 1 hour.
7. Follow instructions from the Kit purchased.
8. Take Oil Analysis, Emissions (Opacity, Soot, Particulate etc.) readings
9. Record any applicable information on the Vehicle Form VH1.

MONTHLY TESTING REQUIREMENTS

1. Record any comments from the Operator of the Vehicle or Equipment.
2. Be sure the Vehicle has been operating the same way each testing period.
3. Take Oil Analysis before any Fluid Change.
4. Record any applicable information on the Vehicle Form VH1.

POST TESTING

1. Once all testing periods have ended, all information should be concluded and calculated.
2. Verify with Client that all information is accurate.
3. Collect testimonial where applicable.
